Appointment

# Isle of Sky Farm

Plant Nursery      Botanical Garden  
High Flight Apiary

Isle of Sky is a small Nursery and Botanical Garden dedicated to sustainable growing practices. Our focus is on native and locally adapted seeds, seedlings, plants, and trees. We offer a unique selection of fruits, berries, roses, flowers and herbs for culinary, medicinal, and bee use.

The High Flight Apiary hives pollinate the gardens and also provide honey and beeswax used to make our healing salves and lip balm. Top Bar beehives, beeswax, and our handmade skin care products are available in the Nursery's shop, as well as raw honey in season.

Our Annual Garden Party is held on the Second Saturday in September. This event is a delicious and educational gathering of Growers and those who love them. Please plan to attend!

To schedule a visit, call Jaimee at 575-648-4015

## Dwarf Apple Selection

Isle of Sky Nursery is continually expanding its present Apple Varieties. These include many old—often rare—varieties collected from homesteads and orchards throughout New Mexico. Many of the parent trees are over a century old and still producing. Apples are grafted on to hardy Dwarf Rootstocks which produce a small, early-to-bear tree. They are suitable for small spaces, containers, or espaliers. With the exception of a few self pollinating varieties, most apples need another variety for pollination. Custom grafting is available, from our our apple collection, or your favorite trees. Scion wood can be grafted onto our Rootstocks or your existing apple tree. Please contact Jaimee for more information.
